

We provide a
fun, easy to
use platform
for traders

We like to think we have a little
something for everyone here.
Whether you are a first-time
trader, seasoned veteran, or
academic professional, we think
that there's a lot to gain.

Paramount Investments is
completely free to use, and
requires only a one time
account creation through any
major web based service.

SYSTEM REQUIREMENTS:

Internet Access

Any Gmail, Facebook, Twitter, or OAuth account

Paramount Investment League

About Paramount Inc.

Paramount Investments consists of a small team of scholars who want to change the way people see online trading. We vow to continue to keep the needs and opinions of our customers first.

We've already gotten started on some really exciting features which we think you'll love. Leaderboards, leagues, achievements, tutorials and information, and a system that grows as you grow are just some of the things we plan to add in the coming weeks

Take control of your future, today

Guided information tutorials for beginners are available, and mouse over a term you're unfamiliar with for a detailed explanation from leading academic resources.

More advanced user? Try a league format, and test your skills against other players. Learn how to trade with the best and which strategies work.

What are your goals?

Whether you are looking for a recreational place to trade stock, working in an academic environment, or simply trying to learn the basics, Paramount Investments has you covered.

What makes us different?

- *Tutorial/Interactive Learning*
- *Interactive Leaderboards*
- *Achievements and Badges*
- *Active ticker for Real Time Updates*

Key Offerings

Paramount Industries can offer a new level of understanding and growth to users who are unfamiliar with the standard market and trading platforms.

With guided advice and tutorials, users will come to learn, and with achievements and badges, users will be compelled to stay and return for months to come.

League functionality will be available to users who want to seek out private learning and group competition. Different victory conditions can be set to ensure users have a completely unique and customizable experience.
